ST Divisions Contractor List

Minor Electrical and Mechanical Engineering Works
for Sewage Treatment

Scope

The contractor listed under this Category is to carry out minor electrical and mechanical engineering works, including alteration, addition and improvement works of sewage treatment and flood protection facilities of contract value not exceeding HK$4,000,000 for construction and engineering works.

The scope of work of this Category covers design, supply, installation and maintenance of electrical and mechanical plants for floodwater and sewage pumping stations and sewage treatment works/plants.

Criteria for Admission to this Category

The minimum admission criteria are as follows :-

1. A registered company in Hong Kong,

2. 3-year relevant local working experience of the company and key personnel of the company, and

3. Relevant job reference of 3 or more jobs each with a contract value of HK$ 300,000 or more in the past 5 years.

Contractors on the Specialist Contractor List of DEVB under the category of "Electrical and Mechanical Installation for Sewage Treatment and Screening Plant" will automatically be included in this Category of the ST Divisions Contractor List. Similarly, if a contractor is under voluntary or mandatory suspension or removed from the above DEVB list, the contractor will also be suspended from bidding for minor works quotations or removed from the ST Divisions Contractor List.

Criteria for Suspension and Deletion

The contractor will be suspended from bidding for minor works quotations if he receives 2 adverse reports due to poor performance within a 12-month period. The contractor's name may also be deleted from the ST Divisions Contractor List if the third adverse report is issued. The contractor's name will be suspended or deleted immediately from the List if he performs poorly on the works on safety and environmental protection, misconduct or suspected misconduct, winding-up, bankruptcy or other financial problems, or failure or refusal to implement an accepted quotation.
