

ST Divisions Contractor List

Minor Electronic Engineering Works for Sewage Treatment

Scope

The contractor listed under this Category is to carry out minor electronic engineering works, including alternation, addition and improvement works of sewage treatment and flood protection facilities of contract value not exceeding HK\$7,000,000 for construction and engineering works.

The scope of work of this Category covers design, supply, installation and maintenance of electronic plants and equipment for floodwater and sewage pumping stations and sewage treatment works/plants. The works include instrumentation, automation control, Monitoring and Control Systems (MACS), Supervisory Control And Data Acquisition (SCADA) Systems, Computerized Management and Maintenance Systems (CMMS), and information technology equipment for floodwater and sewage pumping stations and sewage treatment works/plants.

Criteria for Admission to this Category

The minimum admission criteria are as follows :-

1. A registered company in Hong Kong,
2. 3-year relevant local working experience of the company and key personnel of the company, and
3. Relevant job reference of 3 or more jobs each with a contract value of HK\$ 150,000 or more in the past 5 years.

Criteria for Suspension and Deletion

The contractor will be suspended from bidding for minor works quotations if he receives 2 adverse reports due to poor performance within a 12-month period. The contractor's name may also be deleted from the ST Divisions Contractor List if the third adverse report is issued. The contractor's name will be suspended or deleted immediately from the List if he performs poorly on the works on safety and environmental protection, misconduct or suspected misconduct, winding-up, bankruptcy or other financial problems, or failure or refusal to implement an accepted quotation.
