**DEVB(W)079**

**(Question Serial No. 3218)**

Head: (39) Drainage Services Department

Subhead (No. & title): Not specified

Programme: (1) Stormwater Drainage

Controlling Officer: Director of Drainage Services (LO Kwok-wah)

Director of Bureau: Secretary for Development

Question:

It is stated under Matters Requiring Special Attention in 2019-20 that the feasibility studies on the relocation of Sai Kung sewage treatment works and Sham Tseng sewage treatment works to cavern will be completed. What is the expected completion date for the feasibility study on Sai Kung sewage treatment works?

Asked by: Hon QUAT Elizabeth (LegCo internal reference no.: 175)

Reply:

The feasibility study on the relocation of Sai Kung Sewage Treatment Works to caverns was largely completed at the end of 2018. We will solicit public views on the study findings in the second-stage public engagement (PE2) to be conducted in due course, so as to take holistic account of the planned developments and the supporting road network involved in other ongoing interfacing projects in the vicinity. The results of PE2 together with the findings of technical assessments will be considered as a whole to ascertain the feasibility of the proposed relocation works.
