Appendix: An Overview of Drainage Development in Hong Kong

Year. Notable Developments The Covernment's first identification of local drainage and sewerage needs Reference of Sewerington Canal (600 ft long, 90 ft wide), the first nullah Reference of Completion of Bowrington Canal (600 ft long, 90 ft wide), the first nullah Reference of Completion of Bowrington Canal (600 ft long, 90 ft wide), the first nullah Reference of Completion of Seware or a sanitation by Sir Osbert Chadwick Chadwick's third visit to I long Kong for a sanitation study followed by his recommendation of separate systems for stormwater and sewage Gonstruction of the first water storage tank in Blake Carden The first major sewer rehabilitation works in Connaught Road The first major sewer rehabilitation works in Connaught Road The first major sewer rehabilitation works in Connaught Road The first major sewer rehabilitation works in Connaught Road The first major sewer rehabilitation works in Connaught Road The first major sewer rehabilitation works in Connaught Road The first major sewer rehabilitation works in Connaught Road The first major sewer rehabilitation works in Connaught Road The first major sewer rehabilitation of the Road Road to the harbour-front Release of a report entitled Murne Investigation into Savage Discharges Brid Report setting out the sewage treatment works Release of a report entitled Murne Investigation into Savage Discharges Brid Report setting out the sewage treatment and disposal strategy for Hong Kong The Commissioning of the first plot secondary sewage treatment works in Shek Wu Hui Tommissioning of the first severage severage greatment works in Shek Wu Hui Tommissioning of the First Po Sewage Treatment Works Commissioning of the Tail Po Sewage Treatment Works Commissioning of the Water Pollution Control Ordinance Inclusion of the Shenzhen River Regulation Project in the agenda Commencement of the first severage United Sheman Shem		
 Labo Completion of Bowrington Canal (600 ft long, 90 ft wide), the first nullah Hong Kong's first study report on sanitation by Sir Osbert Chadwick Establishment of the Water and Drainage Department under the Public Works Department Chadwick's third visit to Hong Kong for a sanitation study followed by his recommendation of separate systems for stormwater and sewage Gonstruction of the first water storage tank in Blake Garden The first major sewer rehabilitation works in Connaught Road The first use of sewers for sewage discharge into Craigmin Road Completion of the first stormwater drain from Wan Chai Road to the harbour-front Scessive decking of urban nullahs for road construction and development Commissioning of the sewage screening plant in Anchor Street as the first large sewage treatment works Release of a report entitled Marine Investigation into Sowage Discharges Brigl Report setting out the sewage treatment and disposal strategy for Hong Kong Commissioning of the first secondary sewage treatment works in Shek Wu Hui Commissioning of the First secondary sewage treatment works in Shek Wu Hui Commissioning of the Tai Po Sewage Treatment Works Enactment of the Water Pollution Control Ordinance Enactment of the Water Pollution Control Ordinance Commencement of the first secondary sewage treatment Works, the largest secondary sewage treatment works in Southeast Asia Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Brainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Se	Year	Notable Developments
 1889 Hong Kong's first study report on sanitation by Sir Osbert Chadwick 1891 Establishment of the Water and Drainage Department under the Public Works Department 1902 Chadwick's third visit to Hong Kong for a sanitation study followed by his recommendation of separate systems for stormwater and sewage 1906 Construction of the first water storage tank in Blake Garden 1908 The first major sewer rehabilitation works in Connaught Road 1911 The first use of sewers for sewage discharge into Craigmin Road 1912 Completion of the first stormwater drain from Wan Chai Road to the harbour-front 1951 Successive decking of urban nullahs for road construction and development 1956 Commissioning of the sewage screening plant in Anchor Street as the first large sewage treatment works 1977 Release of a report entitled Marine Investigation into Sewage Discharges. Brig Report setting out the sewage treatment and disposal strategy for Hong Kong 1978 Commissioning of the first plot secondary sewage treatment works in Shek Wu Hui 1975 Commissioning of the Tai Po Sewage Treatment Works 1980 Fnactment of the Water Pollution Control Ordinance 1982 Inclusion of the Shanker Regulation Project in the agenda 1983 Commencement of the Water Pollution Control Ordinance 1984 Inclusion of the Shanker Regulation Project in the agenda 1986 Catablishment of the Environmental Protection Department tasked with sewerage planning 1986 Establishment of the Environmental Protection Department tasked with sewerage planning 1987 Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour 1988 Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territorial Drainage Division under the Civil Engineering Office of th	1854	The Government's first identification of local drainage and sewerage needs
 Istablishment of the Water and Drainage Department under the Public Works Department Chadwick's third visit to Hong Kong for a sanitation study followed by his recommendation of separate systems for stormwater and sewage Construction of the first water storage tank in Blake Garden The first major sewer rehabilitation works in Connaught Road The first major sewer rehabilitation works in Connaught Road The first major sewer rehabilitation works in Connaught Road Completion of the first stormwater drain from Wan Chai Road to the harbour-front Commissioning of the first stormwater drain from Wan Chai Road to the harbour-front Release of a report entitled Marine Investigation into Sewage Discharges. Brid Report setting out the sewage treatment and disposal strategy for Hong Kong Commissioning of the first pilot secondary sewage treatment works in Shek Wu Hui Commissioning of the first pilot secondary sewage treatment works (interim) in Sha Tin Commissioning of the Tai Po Sewage Treatment Works Inclusion of the Shenzhen River Regulation Project in the agenda Commencement of the Mister Pollution Control Ordinance Inclusion of the Shenzhen River Regulation Project in the agenda Commissioning of the First Bood prevention study for the northwestern New Territories Commissioning of the Drainage (Design) Division, Drainage Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department Declaration of the first water control zone in Tolo Harbour Commencement of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department For	1860	Completion of Bowrington Canal (600 ft long, 90 ft wide), the first nullah
 Chadwick's third visit to Hong Kong for a sanitation study followed by his recommendation of separate systems for stormwater and sewage Construction of the first water storage tank in Blake Garden The first major sewer rehabilitation works in Connaught Road The first major sewer rehabilitation works in Connaught Road Completion of the first stormwater drain from Wan Chai Road to the harbour-front Successive decking of urban nullahs for road construction and development Successive decking of urban nullahs for road construction and development Successive decking of urban nullahs for road construction and development Release of a report entitled Marine Investigation into Swage Discharges. Brid Report setting out the sewage treatment and disposal strategy for Hong Kong Commissioning of the first secondary sewage treatment works in Shek Wu Hui Commissioning of the First secondary sewage treatment works (interim) in Sha Tin Commissioning of the Tai Po Sewage Treatment Works Enactment of the Water Pollution Control Ordinance Inclusion of the Shenzhen River Regulation Project in the agenda Commencement of the first flood prevention study for the northwestern New Territories Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in Southeast Asia Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department Declaration of the first swater control zone in Tolo Harbour Commencement of the first Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) <	1882	Hong Kong's first study report on sanitation by Sir Osbert Chadwick
for stormwater and sewage Construction of the first water storage tank in Blake Garden 1908 The first major sewer rehabilitation works in Connaught Road 1911 The first use of sewers for sewage discharge into Craigmin Road 1924 Completion of the first stormwater drain from Wan Chai Road to the harbour-front 1955 Successive decking of urban nullahs for road construction and development 1956 Commissioning of the sewage screening plant in Anchor Street as the first large sewage treatment works 1971 Release of a report entitled Marine Investigation into Sewage Discharges. Brid Report setting out the sewage treatment and disposal strategy for Hong Kong 1974 Commissioning of the first pilot secondary sewage treatment works in Shek Wu Hui 1975 Commissioning of the first secondary sewage treatment works (interim) in Sha Tin 1979 Commissioning of the Tai Po Sewage Treatment Works 1980 Enactment of the Water Pollution Control Ordinance 1982 Inclusion of the Shenzhen River Regulation Project in the agenda Commencement of the first flood prevention study for the northwestern New Territories Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in Southeast Asia 1986 Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department 1987 Declaration of the first water control Zone in Tolo Harbour Commencement of the first village flood protection scheme in Sik Kong Wai 1988 Establishment of the Drainage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1994 Introdu	1891	Establishment of the Water and Drainage Department under the Public Works Department
1908 The first major sewer rehabilitation works in Connaught Road 1911 The first use of sewers for sewage discharge into Craigmin Road 1924 Completion of the first stormwater drain from Wan Chai Road to the harbour-front 1951 Successive decking of urban nullahs for road construction and development 1952 Commissioning of the sewage screening plant in Anchor Street as the first large sewage treatment works 1971 Release of a report entitled Marine Investigation into Sewage Discharges. Brid Report setting out the sewage treatment and disposal strategy for Hong Kong 1974 Commissioning of the first secondary sewage treatment works in Shek Wu Hui 1975 Commissioning of the Tai Po Sewage Treatment Works 1976 Commissioning of the Tai Po Sewage Treatment Works 1978 Commissioning of the Tai Po Sewage Treatment Works 1980 Enactment of the Water Pollution Control Ordinance 1982 Inclusion of the Shenzhen River Regulation Project in the agenda 1984 Commencement of the first flood prevention study for the northwestern New Territories 1985 Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in 1986 Stablishment of the Environmental Protection Department tasked with sewerage planning 1987 Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour 1988 Stablishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and 1988 New Territories Drainage Division under the Givil Engineering Office of the Civil Engineering Services Department 1989 Declaration of the first water control zone in Tolo Harbour 1980 Commencement of the first Sewerage Master Plan for East Kowloon 1981 Sexumissioning of the first village flood protection scheme in Sik Kong Wai 1982 Establishment of the Drainage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1991 Commis	1902	Chadwick's third visit to Hong Kong for a sanitation study followed by his recommendation of separate systems
 1908 The first major sewer rehabilitation works in Connaught Road 1914 The first use of sewers for sewage discharge into Craigmin Road 1924 Completion of the first stormwater drain from Wan Chai Road to the harbour-front 1956 Commissioning of the sewage screening plant in Anchor Street as the first large sewage treatment works 1977 Release of a report entitled Marine Investigation into Sewage Discharges: Brief Report setting out the sewage treatment and disposal strategy for Hong Kong 1974 Commissioning of the first pilot secondary sewage treatment works in Shek Wu Hui 1975 Commissioning of the first pilot secondary sewage treatment works in Shek Wu Hui 1976 Commissioning of the Tai Po Sewage Treatment Works 1980 Enactment of the Water Pollution Control Ordinance 1982 Inclusion of the Shenzhen River Regulation Project in the agenda 1983 Commencement of the first flood prevention study for the northwestern New Territories 1984 Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in Southeast Asia 1986 Establishment of the Environmental Protection Department tasked with sewerage planning 1987 Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour 1987 Declaration of the first Sewerage Master Plan for East Kowloon 1988 Commissioning of the first swerage Master Plan for East Kowloon 1989 Commissioning of the first village flood protection scheme in Sik Kong Wai 1989 Establishment of the Drainage Services Department 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1991 Introduction of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1992 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1993 Commissioning of the Stanley Sewage Treatment Work		for stormwater and sewage
 1911 The first use of sewers for sewage discharge into Craigmin Road 1924 Completion of the first stormwater drain from Wan Chai Road to the harbour-front 1955 Commissioning of the sewage screening plant in Anchor Street as the first large sewage treatment works 1971 Release of a report entitled Marine Investigation into Sewage Discharges: Brief Report setting out the sewage treatment and disposal strategy for Hong Kong 1974 Commissioning of the first pilot secondary sewage treatment works in Shek Wu Hui 1975 Commissioning of the first secondary sewage treatment works (interim) in Sha Tin 1976 Commissioning of the Tai Po Sewage Treatment Works 1980 Enactment of the Water Pollution Control Ordinance 1981 Inclusion of the Shenzhen River Regulation Project in the agenda Commencement of the first flood prevention study for the northwestern New Territories Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in Southeast Asia 1986 Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territorics Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department 1987 Declaration of the first swater control zone in Tolo Harbour Commencement of the first Sewerage Master Plan for East Kowloon 1988 Commissioning of the first swater control zone in Tolo Harbour Commissioning of the First Sewerage Master Plan for East Kowloon 1998 Commissioning of the First Sewerage Master Plan for East Kowloon 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I 1991 Completion of the Territorial Land Drainage	1906	Construction of the first water storage tank in Blake Garden
 Completion of the first stormwater drain from Wan Chai Road to the harbour-front Successive decking of urban nutllahs for road construction and development Release of a report entitled Marine Investigation into Sewage Discharges. Brief Report setting out the sewage treatment and disposal strategy for Hong Kong Commissioning of the first pilot secondary sewage treatment works in Shek Wu Hui Commissioning of the first pilot secondary sewage treatment works (interim) in Sha Tin Commissioning of the Fai Po Sewage Treatment Works Enactment of the Water Pollution Control Ordinance Inclusion of the Shenzhen River Regulation Project in the agenda Commencement of the first flood prevention study for the northwestern New Territories Commencement of the First Flood prevention study for the northwestern New Territories Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in Southeast Asia Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Givil Engineering Office of the Civil Engineering Services Department Declaration of the first water control zone in Tolo Harbour are successed to the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) Completion of the First village flood protection scheme in Sik Kong Wai Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) Completion of the Territorial Land Drainage and Flood Contr	1908	The first major sewer rehabilitation works in Connaught Road
 1951 Successive decking of urban nullahs for road construction and development 1956 Commissioning of the sewage screening plant in Anchor Street as the first large sewage treatment works 1971 Release of a report entitled Marine Investigation into Sewage Discharges: Brief Report setting out the sewage treatment and disposal strategy for Hong Kong 1974 Commissioning of the first pilot secondary sewage treatment works in Shek Wu Hui 1975 Commissioning of the first secondary sewage treatment works (interim) in Sha Tin 1979 Commissioning of the Tai Po Sewage Treatment Works 1980 Enactment of the Water Pollution Control Ordinance 1982 Inclusion of the Shenzhen River Regulation Project in the agenda Commencement of the first flood prevention study for the northwestern New Territories Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in Southeast Asia 1986 Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department 1987 Declaration of the first swere control zone in Tolo Harbour Commencement of the first Sewerage Master Plan for East Kowloon 1988 Commissioning of the first Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1991 Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of Drainage Master Plans and implementation of proposed improvement works in stages Commencement o		
 1956 Commissioning of the sewage screening plant in Anchor Street as the first large sewage treatment works 1971 Release of a report entitled Marine Investigation into Sewage Discharges: Brief Report setting out the sewage treatment and disposal strategy for Hong Kong 1974 Commissioning of the first pilot secondary sewage treatment works in Shek Wu Hui 1975 Commissioning of the first secondary sewage treatment works (interim) in Sha Tin 1979 Commissioning of the Tai Po Sewage Treatment Works 1980 Enactment of the Water Pollution Control Ordinance 1982 Inclusion of the Shenzhen River Regulation Project in the agenda Commencement of the first flood prevention study for the northwestern New Territories Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in Southeast Asia 1986 Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department 1987 Declaration of the first valer control zone in Tolo Harbour Commencement of the first valer control zone in Tolo Harbour Commencement of the First village flood protection scheme in Sik Kong Wai 1989 Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1993 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1994 Introduction of the Sewage Services Charging Scheme to implement the "polluter p	1924	Completion of the first stormwater drain from Wan Chai Road to the harbour-front
 1971 Release of a report entitled Marine Investigation into Sewage Discharges: Brief Report setting out the sewage treatment and disposal strategy for Hong Kong 1974 Commissioning of the first pilot secondary sewage treatment works in Shek Wu Hui 1975 Commissioning of the Fai Po Sewage Treatment Works 1980 Enactment of the Water Pollution Control Ordinance 1982 Inclusion of the Shenzhen River Regulation Project in the agenda Commencement of the first flood prevention study for the northwestern New Territories Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in Southeast Asia 1986 Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Givil Engineering Office of the Civil Engineering Services Department 1987 Declaration of the first water control zone in Tolo Harbour Commencement of the first Sewerage Master Plan for East Kowloon 1988 Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1994 Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Ordinance Commencement of Construction works for HATS Stage 1 1995 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Territorial Land Drainage and Flo		
disposal strategy for Hong Kong 1974 Commissioning of the first pilot secondary sewage treatment works in Shek Wu Hui 1975 Commissioning of the first secondary sewage treatment works (interim) in Sha Tin 1979 Commissioning of the Tai Po Sewage Treatment Works 1980 Enactment of the Water Pollution Control Ordinance 1982 Inclusion of the Shenzhen River Regulation Project in the agenda Commencement of the first flood prevention study for the northwestern New Territories Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in Southeast Asia 1986 Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department 1987 Declaration of the first water control zone in Tolo Harbour Commencement of the first Sewerage Master Plan for East Kowloon 1988 Commissioning of the first village flood protection scheme in Sik Kong Wai 1989 Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1994 Introduction of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1995 Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Master Plans and implementation of proposed improvement works in stages Commencement of Construction works for HATS Stage 1 1995 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Territorial Land Drainage and Flood Control Strategy Study – Ph		
 1975 Commissioning of the Tai Po Sewage Treatment Works 1980 Enactment of the Water Pollution Control Ordinance 1981 Inclusion of the Shenzhen River Regulation Project in the agenda Commencement of the first flood prevention study for the northwestern New Territories Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in Southeast Asia 1986 Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department 1987 Declaration of the first water control zone in Tolo Harbour Commencement of the first Sewerage Master Plan for East Kowloon 1988 Commissioning of the First village flood protection scheme in Sik Kong Wai 1989 Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I 1993 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1994 Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Master Plans and implementation of proposed improvement works in stages Commencement of Construction works for HATS Stage I 1995 Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia 1997 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stanley Sewage T	1971	
 Commissioning of the Tai Po Sewage Treatment Works Enactment of the Water Pollution Control Ordinance Inclusion of the Shenzhen River Regulation Project in the agenda Commencement of the first flood prevention study for the northwestern New Territories Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in Southeast Asia Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department Declaration of the first water control zone in Tolo Harbour Commencement of the first Sewerage Master Plan for East Kowloon Commissioning of the Bratist Sewerage Master Plan for East Kowloon Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I Introduction of the Territorial Land Drainage and Flood Control Strategy Study – Phase II Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Ordinance Commencement of construction works for HATS Stage I Commencement of construction works for HATS Stage I Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia<td>1974</td><td>Commissioning of the first pilot secondary sewage treatment works in Shek Wu Hui</td>	1974	Commissioning of the first pilot secondary sewage treatment works in Shek Wu Hui
 Inactment of the Water Pollution Control Ordinance Inclusion of the Shenzhen River Regulation Project in the agenda Commencement of the first flood prevention study for the northwestern New Territories Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in Southeast Asia Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department Declaration of the first water control zone in Tolo Harbour Commencement of the first Sewerage Master Plan for East Kowloon Stablishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I Completion of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage Volume and pollution level Enactment of Drainage Master Plans and implementation of proposed improvement works in stages Commencement of Construction works for HATS Stage 1 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia Completion of the Territorial Land Drainage and Flood Control Strateg	1975	Commissioning of the first secondary sewage treatment works (interim) in Sha Tin
 Inclusion of the Shenzhen River Regulation Project in the agenda Commencement of the first flood prevention study for the northwestern New Territories Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in Southeast Asia Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department Declaration of the first water control zone in Tolo Harbour Commencement of the first Sewerage Master Plan for East Kowloon Commencement of the First village flood protection scheme in Sik Kong Wai Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Ordinance Commencement of Construction works for HATS Stage I Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Completion of the Territorial Land Drainage and Flood Co	1979	Commissioning of the Tai Po Sewage Treatment Works
Commencement of the first flood prevention study for the northwestern New Territories Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in Southeast Asia 1986 Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department 1987 Declaration of the first water control zone in Tolo Harbour Commencement of the first sewerage Master Plan for East Kowloon 1988 Commissioning of the first village flood protection scheme in Sik Kong Wai 1989 Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I 1993 Completion of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Ordinance Commencement of Drainage Master Plans and implementation of proposed improvement works in stages Commencement of Construction works for HATS Stage 1 1995 Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia 1997 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong	1980	Enactment of the Water Pollution Control Ordinance
Commissioning of the Sha Tin Sewage Treatment Works, the largest secondary sewage treatment works in Southeast Asia 1986 Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department 1987 Declaration of the first water control zone in Tolo Harbour Commencement of the first Sewerage Master Plan for East Kowloon 1988 Commissioning of the first village flood protection scheme in Sik Kong Wai 1989 Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I 1993 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1994 Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Ordinance Commencement of Drainage Master Plans and implementation of proposed improvement works in stages Commencement of Construction works for HATS Stage 1 1995 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia 1997 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong	1982	Inclusion of the Shenzhen River Regulation Project in the agenda
Southeast Asia 1986 Establishment of the Environmental Protection Department tasked with sewerage planning Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department 1987 Declaration of the first water control zone in Tolo Harbour Commencement of the first Sewerage Master Plan for East Kowloon 1988 Commissioning of the first village flood protection scheme in Sik Kong Wai 1989 Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I 1993 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1994 Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Master Plans and implementation of proposed improvement works in stages Commencement of Construction works for HATS Stage 1 1995 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia 1997 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stanley Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong		Commencement of the first flood prevention study for the northwestern New Territories
Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department Declaration of the first water control zone in Tolo Harbour Commencement of the first Sewerage Master Plan for East Kowloon 1988 Commissioning of the first village flood protection scheme in Sik Kong Wai 1989 Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I 1993 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1994 Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Master Plans and implementation of proposed improvement works in stages Commencement of Drainage Master Plans and implementation of proposed improvement works in stages Commencement of Construction works for HATS Stage 1 1995 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia 1997 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong		
Establishment of the Drainage (Design) Division, Drainage (Construction) Division, Urban Drainage Division and New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department 1987 Declaration of the first water control zone in Tolo Harbour Commencement of the first Sewerage Master Plan for East Kowloon 1988 Commissioning of the first village flood protection scheme in Sik Kong Wai 1989 Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I 1993 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1994 Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Ordinance Commencement of Drainage Master Plans and implementation of proposed improvement works in stages Commencement of construction works for HATS Stage 1 1995 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia 1997 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong	1986	Establishment of the Environmental Protection Department tasked with sewerage planning
New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department Declaration of the first water control zone in Tolo Harbour Commencement of the first Sewerage Master Plan for East Kowloon 1988 Commissioning of the first village flood protection scheme in Sik Kong Wai 1989 Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I 1993 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1994 Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Ordinance Commencement of Drainage Master Plans and implementation of proposed improvement works in stages Commencement of construction works for HATS Stage 1 1995 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia 1997 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong		Launch of the Tolo Harbour Action Plan to mitigate the water pollution in Tolo Harbour
Commencement of the first Sewerage Master Plan for East Kowloon 1988 Commissioning of the first village flood protection scheme in Sik Kong Wai 1989 Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I 1993 Completion of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Ordinance Commencement of Drainage Master Plans and implementation of proposed improvement works in stages Commencement of construction works for HATS Stage 1 1995 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia 1997 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong		New Territories Drainage Division under the Civil Engineering Office of the Civil Engineering Services Department
 Commissioning of the first village flood protection scheme in Sik Kong Wai Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Ordinance Commencement of Drainage Master Plans and implementation of proposed improvement works in stages Commencement of construction works for HATS Stage 1 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong 	1987	Declaration of the first water control zone in Tolo Harbour
 Establishment of the Drainage Services Department Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Ordinance Commencement of Drainage Master Plans and implementation of proposed improvement works in stages Commencement of construction works for HATS Stage 1 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong 		Commencement of the first Sewerage Master Plan for East Kowloon
Formulation of the Strategic Sewage Disposal Scheme, later renamed as the Harbour Area Treatment Scheme (HATS) 1990 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I 1993 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II 1994 Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Ordinance Commencement of Drainage Master Plans and implementation of proposed improvement works in stages Commencement of construction works for HATS Stage 1 1995 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia 1997 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong	1988	Commissioning of the first village flood protection scheme in Sik Kong Wai
 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase I Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Ordinance Commencement of Drainage Master Plans and implementation of proposed improvement works in stages Commencement of construction works for HATS Stage 1 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong 	1989	Establishment of the Drainage Services Department
 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase II Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Ordinance Commencement of Drainage Master Plans and implementation of proposed improvement works in stages Commencement of construction works for HATS Stage 1 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong 		
 Introduction of the Sewage Services Charging Scheme to implement the "polluter pays" principle with the charges depending on the sewage volume and pollution level Enactment of the Land Drainage Ordinance Commencement of Drainage Master Plans and implementation of proposed improvement works in stages Commencement of construction works for HATS Stage 1 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong 		
depending on the sewage volume and pollution level Enactment of the Land Drainage Ordinance Commencement of Drainage Master Plans and implementation of proposed improvement works in stages Commencement of construction works for HATS Stage 1 1995 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia 1997 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong		
Commencement of Drainage Master Plans and implementation of proposed improvement works in stages Commencement of construction works for HATS Stage 1 1995 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia 1997 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong	1994	
Commencement of construction works for HATS Stage 1 1995 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia 1997 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong		Enactment of the Land Drainage Ordinance
 Commissioning of the Tolo Harbour Effluent Export Scheme Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong 		Commencement of Drainage Master Plans and implementation of proposed improvement works in stages
Commissioning of the Stanley Sewage Treatment Works, the first secondary sewage treatment works built in a cavern in Asia 1997 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong		Commencement of construction works for HATS Stage 1
cavern in Asia 1997 Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong	1995	Commissioning of the Tolo Harbour Effluent Export Scheme
Commissioning of the Stonecutters Island Sewage Treatment Works, the first chemically-enhanced primary sewage treatment works in Hong Kong		
sewage treatment works in Hong Kong	1997	Completion of the Territorial Land Drainage and Flood Control Strategy Study – Phase III
Completion of the Shenzhen River Regulation Project Stage 1		
		Completion of the Shenzhen River Regulation Project Stage 1

Appendix: An Overview of Drainage Development in Hong Kong (Continued)

Vear	Notable Developments
1998	Commencement of the West Kowloon Drainage Improvement Scheme
	Completion of the Shenzhen River Regulation Project Stage 2
	Completion of HATS Stage 1
2001	Commencement of construction works for the Tai Hang Tung Stormwater Storage Tank
	Commencement of construction works for the Kai Tak Transfer Scheme
	The pioneer incorporation of an engineered wetland into the flood prevention works in San Tin
2004	Commissioning of the Tai Hang Tung Stormwater Storage Tank, the first of its kind in urban areas
2001	Completion of the Kai Tak Transfer Scheme
2005	Decking of 16 nullahs for environmental improvement as proposed in the Policy Address
2003	Commissioning of the Ngong Ping Sewage Treatment Works, the first tertiary sewage treatment works with water
	reclamation facilities in Hong Kong
2006	Commencement of a pilot scheme on reclaimed water at the tertiary sewage treatment works in Ngong Ping
	Completion of the Shenzhen River Regulation Project Stage 3
	Completion of the Yuen Long Bypass Floodway
	Commencement of construction works for the Sheung Wan Stormwater Pumping Station
	Completion of the Ping Yuen River Training Works
	Opening of the first sewage treatment information centre at the Stonecutters Island Sewage Treatment Works
2007	Commencement of construction works for the Hong Kong West Drainage Tunnel
	Commencement of construction works for the Tsuen Wan Drainage Tunnel
2008	Commencement of construction works for the Lai Chi Kok Drainage Tunnel
	Commencement of Drainage Master Plan Review Studies for various districts in stages
2009	Commissioning of the Sheung Wan Stormwater Storage Scheme
	Commissioning of the new Emergency Control Centre
2010	Commissioning of advance disinfection facilities at the Stonecutters Island Sewage Treatment Works under HATS
	Stage 2A
	Elimination of all major flooding blackspots in Hong Kong
	Commissioning of the water reclamation facilities and information centre at the Sha Tin Sewage Treatment Works
	Commencement of construction works for the Provision of Interception Facilities at Kowloon Bay stormwater box
2011	culvert Control of the National Control of the Cont
2011	Commencement of construction works for the Happy Valley Underground Stormwater Storage Scheme
	Completion of the Drainage Master Plan Review Studies for Yuen Long, North District and Happy Valley
2012	Commencement of the River Flood Risk Study in stages
2012	Commissioning of the Hong Kong West Drainage Tunnel
	Commissioning of the Lai Chi Kok Drainage Tunnel Completion of the Improvement of Fuk Man Road Nullah in Sai Kung, the first project under the new engineering
	contract (NEC)
	Commencement of construction works for the Kai Tak River Improvement Works
	Commencement of the feasibility study on the relocation of the Sha Tin Sewage Treatment Works to caverns
	Completion of the River Flood Risk Study, Stage 1
2013	Commissioning of the Tsuen Wan Drainage Tunnel
	Commencement of construction works for the Shenzhen River Regulation Project Stage 4
	Commissioning of the new information centre at the Sha Tin Sewage Treatment Works
2014	Commissioning of the Butterfly Valley Road Pet Garden atop the stilling basin of the Lai Chi Kok Drainage Tunnel
	Launch of DSD Eco-channels Database Management System
	Completion of the Provision of Interception Facilities at Kowloon Bay stormwater box culvert
	Completion of the Upgrading of Pillar Point Sewage Treatment Works, the first project of its kind under the
	design-build-operate (DBO) contract
	DSD International Conference on "Sustainable Stormwater and Wastewater Management"

Acknowledgements

We would like to express our heartfelt gratitude to people from all walks of life, organisations and government departments (in alphabetical order) for giving an interview, providing numerous precious photographs and offering support during the research, editing and production of this publication.

Interviewees:

Mr Chan Hok-fung Vice Chairman of Central and Western District Council

Mr Chan Kam a Tai O resident

Dr Cheng Luk-ki Division Head of Scientific Research and Conservation of Green Power

Mr Cheung Hoi-ping
Mr Fan Sum-kee
Professor Jim Chi-yung

Vice-chairman of the Joint Association of Traditional Dragon Boats in Tai O, Hong Kong
Chairman of the Joint Association of Traditional Dragon Boats in Tai O, Hong Kong
Chair Professor of the Department of Geography of the University of Hong Kong

Mr Lam Hon-wah Director of the Nam Pak Hong Association

Professor Lee Hun-wei Joseph Vice President for Research and Graduate Studies of the Hong Kong University of Science

and Technology

Ms Leung a Tai O resident

Mr Liu Hing-hung Indigenous Inhabitant Representative of Sheung Shui Heung

Mr Mak Ching-po Chairman of the Hong Kong Dried Seafood and Grocery Merchants Association

Mr Ng Cheng-cheong Vice-chairman of the Joint Association of Traditional Dragon Boats in Tai O, Hong Kong

Mr Ng Shui-ching Indigenous Inhabitant Representative of Mui Tsz Lam Village

Ms Sia Siu-ping Resident Engineer for the Water and Urban Development team of AECOM Asia Company

Limited (Hong Kong)

Mr Wong Dong-keung Resident Representative of Ma Tin Tsuen

Mr Wong Man-chiu Honorary Secretary of the Hong Kong Amateur Swimming Association

Ms Wong Shau-ping a Wan Chai resident
